Alazar Tilahun

SKILLS / TOOLS

Programming Languages: Java, C#, .NET, PHP, JavaScript (ES6+), TypeScript, HTML5, CSS3, Groovy

Frameworks & Technologies: Spring Boot, ASP.NET Core, React, Next.js, GraphQL, Kafka, Microservices, Spring Security, Docker, Laravel, Joomla, Keycloak, LDAP

Cloud & Microsoft Azure: Microsoft Azure, Azure App Service, Azure Virtual Machines, Azure SQL Database, Azure Storage, Azure Blob Storage, Azure Key Vault, Microsoft Entra ID (Azure Active Directory), Azure Monitor, Azure Application Insights

Databases: PostgreSQL Administration, MySQL Administration, SQL Server, Redis, Database Design, Query Optimization, Performance Tuning, Indexing, Stored Procedures, Backup & Recovery, Database Migration, Transaction Management

DevOps & CI/CD : Docker, Kubernetes, Jenkins, Harbor, Git, GitLab, GitLab CI/CDm, Terraform

Architecture & Distributed Systems : Microservices, Event-Driven Architecture, REST APIs, kafka, API Gateway,SQRS,Caching API Gateway, Distributed Systems, Service Discovery (Eureka), Domain-Driven Design,

Monitoring & Logging : Grafana, Prometheus, Azure Monitor, Application Insight

EDUCATION

BSc in Software Engineering

Mekelle University

2017/2018 - 2022

Gained valuable experience in a diverse environment.

PROFILE

Senior Technical Lead and Full Stack Engineer with 6+ years of experience designing scalable fintech platforms, distributed systems, and cloud-native applications. Specialized in Java/Spring Boot, .NET, Next.js/React, and event-driven microservices using Kafka. Experienced in architecting payment platforms, leading engineering teams, optimizing high-throughput systems, and building secure, resilient solutions. Strong background in distributed system design, database optimization, cloud technologies, and production observability with Grafana and Prometheus.

WORK EXPERIENCE

Senior Full Stack Developer (Tech Lead)

February 2026 - Present

MPI (Mindsight Performance)

- Served as Technical Lead, driving frontend and overall architecture decisions for scalable enterprise applications.
- Designed scalable cloud-native backend services supporting enterprise workloads with Microsoft Azure deployment support.
- Managed Azure App Services, Virtual Machines, Azure SQL Database, and cloud infrastructure environments.
- Implemented Microsoft Entra ID (Azure Active Directory) authentication and role-based access control.
- Configured Azure Monitor and Application Insights to improve application monitoring and production visibility.
- Designed and optimized PostgreSQL databases, improving reporting and application performance.
- Led frontend and backend development using React, Next.js, Spring Boot, and .NET.
- Mentored developers, conducted architecture reviews, and established engineering best practices.
- Collaborated with cloud infrastructure teams to deploy scalable Azure environments.
- Led architecture decisions focused on scalability, maintainability, and production readiness.
- Established engineering standards through mentoring, architecture reviews, and code quality initiatives.

Spring boot Developer → Senior Software Engineer → Tech Lead

Arifpay Financial Technologies

Nov 2024 - Present

- Architected distributed event-driven microservices using Spring Boot and Kafka for high-volume payment processing.
- Designed resilient payment workflows for recurring billing, merchant settlement, split payments, and payment notifications.
- Built asynchronous event pipelines enabling loosely coupled services across payment processing, notifications, reporting, and merchant management.
- Optimized PostgreSQL and MySQL performance through indexing, query tuning, schema optimization, and transaction management.
- Led technical architecture discussions, code reviews, and engineering best practices across two development teams.
- Diagnosed and resolved complex production issues involving distributed services, authentication, and database performance.
- Collaborated closely with DevOps teams on cloud deployments, containerized applications, and production infrastructure.

LANGUAGES

Amharic

English

KEY ACHIEVEMENTS

- 50% performance gain at ArifPay via system refactoring.
- 7+ developers mentored across roles.
- 10+ full-stack projects delivered (fintech, CMS, microservices).

AI ASSISTED DEVELOPMENT

- GitHub Copilot , ChatGPT, Cursor AI, AI Code Review , Prompt Engineering, Developer Productivity

Backend Developer Intern (Cybersecurity Team)
Safaricom et.

April 2024 - July 2024

- Developed Python automation scripts to perform CIS compliance validation across enterprise systems.
- Centralized reporting for third-party applications using Spring Boot APIs and Next.js dashboards.
- Implemented Microsoft Entra ID (Azure Active Directory), Keycloak, LDAP, and OAuth 2.0 authentication.
- Designed production monitoring dashboards using Grafana and Prometheus to improve system observability.
- Implemented secure identity management using Microsoft Entra ID, Keycloak, LDAP, and OAuth 2.0.
- Automated compliance validation and production reporting using Spring Boot and Python.
- Assisted in cloud deployment and infrastructure management using Microsoft Azure services.
- Improved operational visibility by integrating centralized monitoring and reporting solutions.

Reffrences
Ebsa Olijira : +251799209424

Backend Developer (Training Program)

Gebeya Inc.

Sep 2023 - June 2024

- Developed secure USSD banking APIs using Spring Boot, Spring Security, and MySQL.
- Designed and implemented microservice-based applications using Spring Boot, Eureka Service Discovery, and API Gateway.
- Designed PostgreSQL and MySQL database schemas for scalable enterprise applications.
- Optimized SQL queries and database performance for production workloads.
- Built Dockerized backend services supporting cloud-native deployments.
- Implemented secure authentication and authorization using Spring Security.
- Contributed to distributed backend architectures serving over 1,200 users.

Senior Joomla/PHP Developer

Freelance (Upwork & BGWG)

March 2023 - June 2026

- Delivered Noah Real Estate’s website with custom property search filters (PHP/Joomla), increasing leads by 25%.
- Optimized Sinopia Furnitures’ SEO, boosting organic traffic by 60% in 3 months.
- Collaborations
- Remote work for Bosst Performances (USA), fixing performance bottlenecks and reducing page load time by 35%.

Frontend Developer → Team Lead

Betolo IT Solution PLC

June 2022 - Feburary 2023

- Built ezmtrade.com (e-commerce) and redbricktravel.com (tourism), handling 10K+ monthly visitors.
- Customized PHP modules for Belayneh Kinde Exports to streamline product catalog updates.
- Leadership
- Promoted to lead after 4 months; trained 2 junior developers in Joomla and client communication.

Reffrences
Ayehou Mesfin : +251 91 160 8874

Junior Laravel Developer

Adika Internship

Dec 2021 - May 2022

- Developed a car rental platform with dynamic pricing (Laravel + Stripe integration).
- Contributed to AdikaTaxi.com, implementing real-time ride tracking using Google Maps API.
